Vision Statement

At Emerging Minds Montessori Academy, we strive to follow the child in all areas of human development, by creating an environment rich in age-appropriate lessons to be experienced by each child at their individual pace in their unique education style. We observe periods of readiness diligently and support each student's abilities with integrity, compassion, and intentionality. We will follow, support, and respect our school's mission and adhere to the pedagogy of Dr. Montessori while embodying her call for all adults to lead by example. In doing so, it is our sincere hope to create generations of independent, life-long learners, and to create a broader community with a deep desire for a Montessori Education.
